| FEATURES   |  |
|--|--|
| * Microcomputer circuit assures maximum possible accuracy, provides special functions and features.  | * Innovative feature with built-in automatic temperature compensation values, adjustable between 0 to 5.0% per °C. Turning the dial to 0% per °C allows you to take uncompensated conductivity readings. |
| * Super large LCD display with contrast adjustment for best viewing angle.   |  |
| * Dual function meter's display.   | * Wide automatic temperature compensation range from 0 °C to 60 °C, high accuracy.   |
| * Heavy duty & compact housing case, designed for easy carry out & operation.  | * Carbon rod electrode for long life.  |
| * Records Maximum, Minimum and Average readings with RECALL.   | * Show the conductivity & temperature values at the same LCD display.  |
| * DATA HOLD function for stored the desired value on display.  | * Temperature function for °C or °F be selected by push button on front panel easily.  |
| * Auto shut off saves battery life.  | * Built-in low battery indicator.  |
| * The portable conductivity meter provides fast, accurate readings, with digital readability and the convenience of a remote probe separately. | * Wide applications: water conditioning, aquariums, beverage, fish hatcheries, food processing, photography, laboratory, paper industry, quality control, school & college, water conditioning.          |
| * RS 232 PC serial interface.  |  |
| * Multi-measuring ranges: 200 uS, 2 mS, 20 mS.   |  |
